PROFESSIONAL SUMMARY

Software architect and product engineer with 25+ years of experience. Co-founder of SoftInstigate, creator of RESTHeart. Background spans enterprise integration, cloud platforms, distributed systems, and AI-augmented development. Former SOA architect at Sun Microsystems (EMEA) and Technical Architect at AKQA Berlin.

TECHNICAL SKILLS

Strategy and Leadership: Fractional CTO, Architecture Review, Technical Due Diligence, Stakeholder Management, Business Development

Architecture: Distributed Systems, Microservices, Cloud-Native, SOA, EAI,DDD, CQRS, API Design

Backend: Java, Node.js, GraalVM, REST, WebSocket, Server-Sent Events (SSE), OpenAPI

Data: MongoDB, PostgreSQL, Relational and NoSQL, Document Design, Schema Migration, Event-Driven Architecture

Cloud (AWS): ECS, Lambda, API Gateway, CloudFront, ALB, S3, Route 53

Platform: Docker, CI/CD, Continuous Delivery, Observability, Security, Performance optimization

Frontend: Angular, Headless CMS, Static Site Generation, Server-Side Rendering

AI: LLM integration, RAG, Agentic Workflows, Model Context Protocol (MCP)

EDUCATION

MSc Information Science

Università degli Studi di Milano
1993 - 1999

LANGUAGES

Italian Native
English Professional Working Proficiency

INTRODUCTION

Having seen the same class of problems from inside a technology vendor, a global digital agency, and a product company I built myself gives me a perspective that is difficult to acquire any other way. I take on fractional CTO and advisory engagements where that combination of judgment and hands-on experience matters: architecture decisions that need to stick, technical assessments an organization can trust, and delivery that has stalled and needs someone to unblock it.

KEY PROJECTS

LUXURY E-COMMERCE

Technical lead for a global luxury brand's e-commerce platform in China. Coordinated distributed engineering teams across Berlin, Geneva, and Shanghai.

MOBILITY AND PUBLIC SECTOR

Traffic data platform (GART) for ACI group, in production since 2017 with zero critical outages. 15+ data sources in DATEX II format, 7/7 365-day SLA. AWS ECS, Lambda, CloudFront, MongoDB Atlas.

ENTERPRISE CONTENT

RESTHeart integrated as core persistence and API layer for Crownpeak Content-as-a-Service, deployed on Kubernetes to thousands of enterprise clients globally across Europe and North America.

PUBLIC SECTOR

Architectural assessment of a public-facing compliance platform: 1M+ users, millions of requests per hour, sub-second response times. Performance analysis, bottleneck identification, and strategic roadmap.

RETAIL BACKEND MODERNIZATION

Technical lead for modernization of a high-volume production backend: 2,600+ stores, 9,500+ terminals, 141M+ documents, 1TB+ data. Throughput target exceeded by 79%: 537 req/sec vs 300 required. Query time reduced 216x.

OPEN SOURCE PLATFORM

RESTHeart: 2M+ open-source downloads, 10+ years in production. Adopted by Fortune 500 companies including Unisys, Northrop Grumman, and Crownpeak.

EXPERIENCE

• Technical Advisor | Product Engineer | Co-Founder

09/2014 - present

SoftInstigate · Italy

Engineering and advisory work spanning product development, platform strategy, and client engagements. Led architecture, cloud transformation, and technical delivery for SaaS and e-commerce products across automotive, retail, sustainability, and public sector, with a focus on scalability, availability, and security at every layer of the stack.

KEY ACHIEVEMENTS

- Co-created RESTHeart, an open-source backend for MongoDB with 2M+ downloads, 10+ years in production, adopted by Fortune 500 companies including Unisys, Northrop Grumman, and Crownpeak
- Designed and delivered GART, a traffic data platform for the ACI group, in production since 2017 with zero critical outages under a 7/7 365-day SLA
- Led backend modernization for a retail platform serving 2,600+ stores and 9,500+ terminals (141M+ documents, 1TB+ data); throughput target exceeded by 79%, query time reduced 216x

Technology stack: Java, GraalVM, Node.js, Angular, MongoDB, AWS (ECS, API Gateway, Lambda, CloudFront), Docker, REST APIs, CI/CD, AI-assisted development

TECHNICAL TRAINING DELIVERY

Created and delivered technical courses and workshops for enterprise clients and partner networks across Italy and EMEA, covering Java, Git, Maven, MongoDB, and Docker.

PUBLICATIONS

- Instant Apache Maven Starter (Packt Publishing, 2013)
- Visualisation of Geographic Information in a Dynamic 3-Dimensional Environment (1999)

WRITING

- Practical notes from the architecture trenches.

The system is working. That is the problem. (Jun 2026) [maurizioturatti.com](#)

EXPERIENCE (CONTINUED)

- **Technical Architect**10/2013 - 08/2014

AKQA · Berlin, Germany

Technical architect for enterprise digital transformation at a global digital agency. Delivered a luxury brand's e-commerce platform in China (Adobe Experience Manager), coordinating distributed engineering teams across Berlin, Geneva, and Shanghai.

KEY RESPONSIBILITIES

- Solution architecture for large-scale digital platforms and enterprise content management systems
 - Pre-sales: technical proposals, architecture documentation, and cost estimation for RFPs
 - Technology evaluation and recommendation for enterprise content management and digital platforms
 - Risk assessment and technical feasibility analysis for complex transformation programs

Technology stack: Java, Adobe Experience Manager, Docker, enterprise integration patterns
- **Delivery Manager**12/2011 - 05/2013

Sourcesense · Milan, Italy

Led a consulting team delivering open-source enterprise solutions across finance, telecom, and public sector. Combined technical leadership with commercial responsibilities and business development.

- Team management, technical mentoring, and recruiting for consulting practice
 - Business development and pre-sales: solution design, proposals, client presentations
 - Delivery oversight for enterprise projects with open-source technologies
- **Senior Solutions Engineer**01/2010 - 12/2011

Alfresco · Italy

Supported the launch of Alfresco's Italian market operations. Delivered pre-sales consulting and technical engagements for enterprise content management across enterprise clients and system integrators.

- Pre-sales consulting and solution design for enterprise content management
 - Technical consulting engagements with enterprise clients and system integrators
 - Partner enablement and technical training on the Alfresco platform
- **Enterprise Integration Architect (Independent)**07/2007 - 01/2010

Self Employed · EMEA

Independent consultant specializing in enterprise architecture, Service-Oriented Architecture (SOA), and Enterprise Application Integration (EAI) across Europe and the Middle East. Official consulting and training partner for Sun Microsystems, delivering Java CAPS and Open ESB (Enterprise Service Bus) projects.

- Enterprise architecture consulting for complex system integration projects across EMEA
 - SOA/EAI solution design and implementation using Java CAPS and Open ESB platforms
 - Technical training delivery for enterprise clients and Sun Microsystems partners

Technology stack: Java CAPS, Open ESB, SOA/EAI patterns, enterprise middleware
- **Senior Enterprise Integration Architect**08/2006 - 06/2007

Sun Microsystems · Italy / EMEA

Lead architect for Service-Oriented Architecture (SOA) and enterprise integration in the Italian market. Member of Sun's EMEA SOA/BI Consulting Practice, working with Fortune 500 clients on large-scale integration programs.

- Lead architecture role for SOA/EAI solution delivery across Italian and EMEA enterprise clients
 - Enterprise integration architecture design on ICAN (Integration Composite Application Network) and Java CAPS
 - Pre-sales technical consulting and solution positioning

Technology stack: Java CAPS, ICAN, Open ESB, SOA/EAI patterns

EDUCATION

MSc Information Science
Università degli Studi di Milano
1993 - 1999

EARLY CAREER CONTEXT

Roles from 1997 to 2004 built the technical foundation: distributed systems, real-time graphics, machine learning research, and large-scale consumer platforms. The progression from research to product to enterprise integration reflects a consistent focus on systems that work at scale.

EXPERIENCE (CONTINUED)

● **Enterprise Integration Architect** 09/2004 - 08/2006
SeeBeyond · EMEA

Delivered enterprise integration consulting for SeeBeyond's major European customers across EMEA. Implemented ICAN and Java CAPS integration solutions for complex system integration projects.

- SOA/EAI solution implementation for enterprise customers across Europe
- Technical consulting for ICAN and Java CAPS integration platforms
- Partner enablement and technical support across EMEA

Technology stack: ICAN, Java CAPS, enterprise application integration, middleware platforms

EARLIER CAREER

● **Senior Java Consultant** 02/2004 - 08/2004
Iriscube Reply · Milan, Italy

Developed a scalable distributed messaging system for Vodafone built on Java Jini technology, integrated with a multi-device content delivery platform serving mobile and web channels.

Technology stack: Java, Java Jini, distributed systems, asynchronous message processing

● **Software Architect** 08/2001 - 01/2004
I-Side · Italy

Software architect for web and instant messaging applications. Core development team member for Tiscali Messenger, one of the first large-scale consumer instant messaging platforms in Italy.

Technology stack: Java, C++, instant messaging protocols, distributed systems

● **Researcher and Software Developer** 04/1998 - 08/2001
Artificial Intelligence Software · Italy

Developed 3D graphics and real-time visualization algorithms for GIS terrain models and industrial applications in the automotive and aerospace sectors. Worked on distributed visualization systems across heterogeneous platforms.

Technology stack: OpenGL, Java, Python, C++, Linux, Windows, SGI IRIX

● **Research Programmer** 04/1997 - 11/1997
Università degli Studi di Milano · Milan, Italy

Research assistant in computational geometry and machine learning. Developed a probabilistic learning system in C++ based on Adaptive Boosting of Neural Networks (AdaBoost) for pattern recognition, and contributed to research on Probably Approximately Correct (PAC) learning algorithms.

Technology stack: C++, neural networks, computational geometry, 3D GIS visualization
